

PIO LUBERTO

Computer Engineer | Full-Stack Developer | IT Support Specialist

Harare, Zimbabwe | +263 718 055 868 | aceluberto@gmail.com
Portfolio: pio-xi.github.io/pio-portfolio/ | GitHub: github.com/Pio-xi

PROFESSIONAL SUMMARY

Highly analytical and motivated Computer Engineering graduate with hands-on experience in full-stack web development, network administration, and enterprise IT support. Demonstrates a strong track record of designing responsive web applications, optimizing system performance, and delivering cross-functional technical support. Adept at bridging the gap between robust infrastructure management and modern frontend technologies to solve complex business problems.

TECHNICAL SKILLS

- Web & Full-Stack Development:** HTML5, CSS3, JavaScript, Node.js, Express.js, Responsive Web Design, REST API Integration, Git, GitHub, GitHub Pages Deployment
- CMS & Design Tools:** WordPress Development, Elementor Pro, UI/UX Optimization
- Databases & Data Management:** MySQL, SQL Fundamentals, Relational Database Design
- Networking & Infrastructure:** TCP/IP, DNS, DHCP, Routing & Switching Fundamentals, LAN Support, Network Troubleshooting, Cisco Networking Architecture
- IT Support & Systems Administration:** Hardware/Software Troubleshooting, Windows Administration, System Maintenance, Technical Documentation, End-User Training

PROFESSIONAL EXPERIENCE

IT Support Intern

Westridge Primary School

July 2024 – August 2025

Harare, Zimbabwe

- Managed day-to-day IT infrastructure operations, providing rapid-response technical and troubleshooting support to over 50+ staff members and learners.
- Diagnosed and resolved complex hardware and software bottlenecks, maximizing uptime for classroom technology and computer laboratory systems.
- Administered regular system maintenance, software installations, and peripheral upgrades across the institution's workstation fleet.
- Authored comprehensive technical documentation, training materials, and performance reports to streamline internal IT onboarding and operations.
- Collaborated on strategic ICT projects, contributing to infrastructure scaling and network performance optimization under the guidance of the ICT Department Head.

FEATURED PROJECTS

E Lab Robotics Corporate Website | Lead Web Developer

- Engineered and deployed a modern, highly responsive WordPress corporate website featuring custom blog feeds, media galleries, events modules, and product showcases.

- Configured enterprise hosting solutions, managed DNS/domain setups, and secured deployment architectures.
- Utilized Elementor Pro and custom CSS overrides to build fluid layouts, resulting in an optimized user experience across all mobile and desktop viewports.

Live Project: <https://www.elabrobotics.co.zw>

Global College Educational Platform | Frontend Developer & UX Customizer

- Overhauled the website user interface (UI) to improve digital accessibility, navigation pathways, and client-side presentation.
- Enhanced interactive components across critical funnels, including the digital admissions portal, dynamic contact forms, and institutional information directories.
- Leveraged HTML, CSS, and JavaScript to inject responsive frontend improvements, strictly aligning the platform with modern web standards.

Live Project: <https://www.globalcollege.co.zw>

EDUCATION

Bachelor of Engineering (Honours) in Computer Engineering

Chinhoyi University of Technology

Graduated
Chinhoyi, Zimbabwe

Core Competencies Covered: Computer Systems Architecture, Network Engineering, Software Engineering Methodology, Database Systems, and IT Infrastructure.

CERTIFICATIONS & TRAINING

- **Cisco Networking Academy:** CCNAv7 Suite (Introduction to Networks; Switching, Routing, and Wireless Essentials; Enterprise Networking, Security, and Automation)
- **Google Digital Skills for Africa:** Fundamentals of Digital Marketing
- **HEXCO:** ICT Fundamentals
- **Alliance Française:** DELF A1 & DELF A2 Proficiency Certifications (French Language)

ADDITIONAL INFORMATION & SOFT SKILLS

- **Licence:** Clean Class 4 Driver’s Licence
- **Strengths:** Complex problem-solving, analytical troubleshooting, technical documentation writing, cross-functional teamwork, and high adaptability under tight project timelines.
